SADC CENTRE FOR RENEWABLE
ENERGY & ENERGY EFFICIENCY

ENERGY STAKEHOLDERS MEETING
& SAPP MARKET ROADSHOW

29 May 2024

Tropico Hotel, Luanda, Angola

The Southern African Power Pool (SAPP) is the first power pool to have been established in Africa and incorporates all 12 SADC mainland Member States. It was created in April 1995 through the SADC Treaty. The SADC Council of Ministers at its meeting held in Johannesburg, South Africa in August 1995 approved the Intergovernmental Memorandum of Understanding (IGMOU) on SAPP and mandated the Ministers responsible for Energy to sign it on behalf of their Governments.

The SAPP wholesale electricity exchange is a unique model that aggregates regional demand and supply through a transparent marketplace. It is designed to incorporate the individual strengths and assets of each country combining heritage bilateral contracts and forward-looking auction products modernity. The SAPP operates five auction products to complement the needs of its members from a regional perspective. The SAPP vision is to be a fully integrated, competitive energy market and a provider of sustainable energy solutions for the SADC region and beyond, to promote regional cooperation in power projects (Generation and Transmission) and to reduce load shedding amongst its members.

The Directorate of Infrastructure of the SADC Secretariat, Regional Energy Regulators Association of Southern Africa (RERA) and SADC Centre for Renewable Energy and Energy Efficiency (SACREEE) invites interested stakeholders to the Energy Stakeholders and SAPP Market Roadshow at Tropico Hotel, Luanda, Angola on the 29th of May 2024. The energy stakeholders and market roadshow aims to bring various stakeholders in the electricity sector in Angola and provide an opportunity to better understand the wholesale auction electricity market products, regulations, and opportunities available and create conversations for both exhibitors and attendees to experience the benefit of the personal touch.

Each event features a hand-picked selection of knowledgeable speakers in a roundtable format which allows for open, productive conversations. The overall objective of the exercise is to expose decision-makers in the energy sector of the SADC region to the importance and key facets of the SAPP wholesale electricity market.

If you are an interested stakeholder, Utility, Regulator, Independent Power Producer, Independent Transmission Company, Financier, and future large customer, please complete the Registration Form for each person attending the event. Places are available on a limited basis.
